PROFESSIONAL SUMMARY

UI/UX designer and fourth-year Software Engineering student with about two years of experience designing mobile and web products, from first screens to interactive prototypes tested with users. Because I also build what I design, my work is made with real constraints in mind and hands over cleanly to developers. Looking for a UI/UX design role or internship where I can shape user-centered products.

WORK EXPERIENCE

Frontend Designer & Mobile Application Developer · OurMoment

CosmicTechPlc — **May 2026 – Present**

- Designed the interface and experience of a digital gifting platform, so users can create, personalize and share moments with little effort.
- Carried the design from web to mobile and built the mobile app with Expo (React Native).

Web/Mobile App Designer & Developer · ORG-360

CosmicTechPlc — **Jan 2026 – Present**

- Designed and built the interface for a platform where venues publish shareable 360° virtual tours, focusing on making navigation through a space feel natural.
- Designed the companion mobile app for managing and presenting spaces.

UI/UX Designer · Ashu Geberew

CosmicTechPlc — **Jan 2025 – Feb 2025**

- Designed a mobile application and its “download our app” website end to end, covering the interface and the user experience.

Mobile Application Developer · GebetaRSM

CosmicTechPlc — **Aug 2026 – Present**

- Implemented mobile features in Expo (React Native), keeping the product consistent with its web counterpart.

Web Contributor · BekurGuide

CosmicTechPlc — **Mar 2025 – Aug 2026**

- Contributed to the web application, keeping the interface aligned with user needs.
